

# Thirsch

*New eco-friendly grape variety!*

## MUSCARIS 2021

New fungus-resistant grape variety (PIWI).  
Hybridized at the Staatliches Weinbauinstitut Freiburg (DE) from the grape varieties Solaris (♀) and Gelber Muskateller (♂). Reduction of pollution to the environment (80 to 90% less spraying).

### Thirsch wines:

Thirsch wines are full-bodied, with a unique style and reflect our way of working with nature.  
Thirsch is the historical name of our farm and winery.

### Vineyard:

5-12 year old vines grow on Opok soils.  
"Opok" is a solidified sedimentary rock, formed by marine and river deposits.  
The soil has a high clay content, can absorb warmth well and provides optimal ripening conditions for the grapes.

### Winemaking:

Short maceration, fermented without chilling in stainless steel tanks, 10% fermented on the skins, aged 23 months on the fine lees. Bottled without filtration in September 2023.

### Organic wine:

Taste Profile: Reminiscent of Muscat and Grapefruit.  
13.5% alcohol - 1.1 g/L residual sugar – 6.2 g/L acidity.
